TIME FOR SHOPPING

Monday Tuesday Wednesday Thursday	} 8 a.m. - 5 ³⁰ p.m.	Friday	8 a.m. - 8 p.m.
		Saturday	8 a.m. - 2 p.m.

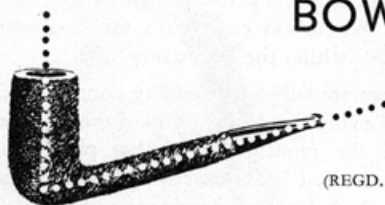

...in this catalogue FROM PAGE 3 TO PAGE 45 INCL.

YOU ARE LOOKING AT

THE **DAN** ^{SHAPE-}_{REFORMED} **PIPES**

WHICH SIMPLY MEANS: THE PIPES WITH THE
VERTICAL

BOWLS

(REGD. TRADE MARK)

THESE PIPES ARE NOT MACHINE MADE! EACH PIPE IS THE RESULT OF FINE BRAIN WORK. THEY ARE HAND-TURNED OUT OF SELECTED MATURED VERY OLD CORSICAN BRIAR. THE INTERPLAY OF A FINE EYE AND A STEADY HAND HAS CREATED THE PERFECT SHAPED PRODUCT.

Pipe-DAN makes pipe-history! He is the first man in the world who has created a pipe, where

- each bowl is *vertical*
during smoking..... thus **EVEN** smoking!
- each bowl is high..... thus **LONGER** smoking!
- each bowl is small-bored,
12 to 17 mm inside..... thus **COOLER** smoking!
- each bowl easier to smoke
down to the very bottom thus **DRY** smoking!

EVEN - LONGER - COOLER - DRY

No other pipe but a DAN pipe will suit you equally well in all these ways. That is why we call our pipes 'shape-reformed'. Remember these four items, and remember also when visiting Copenhagen...

DON'T PASS BY - WHEN YOU PASS BY...

PIPE DAN

13 VESTERGADE

Just off the Town Hall Square

It is the age and the domicile of the briar, its hardness and structure of grain, its adaptability coordinated with our skilled knowledge that determine the price of each pipe. EACH DAN PIPE IS STAMPED WITH THE PRICE AND DATED TOO!

Each DAN pipe has a specially lined bowl, to keep it free from the taste of wood.

Each DAN pipe-shape is delivered with a special scraper for thinning the carbon crust to a fine uniform layer within the whole bowl.

All DAN pipes are subject to quality control while you are present. We check and advise you of the thickness and the shape of the mouthpiece of that pipe you have chosen to ensure that it fits exactly the position of your teeth and that the balance of the pipe is correct. We adjust the mouthpiece accordingly while you wait and under your own control, and

This service is unique in the world

Initials or a short name can be stamped in each pipe—it takes only one minute. This is an excellent idea if you want to use a DAN pipe as a gift or to add something very personal to the pipe you are presenting to yourself.

Should any DAN pipe burn through the side or bottom due to defective material or workmanship, a new bowl will be provided by us on request and free of charge.

Destruction of the pipe due to too tough smoking, or too heavy scraping out, will not entitle to replacement!

BUT YOU CAN ALSO HAVE YOUR
OWN PIPESHAPE

MADE BY OUR PIPE-MAKERS IF YOU THEN WILL
MAIL US A SKETCH!

PIPE-REPAIRS

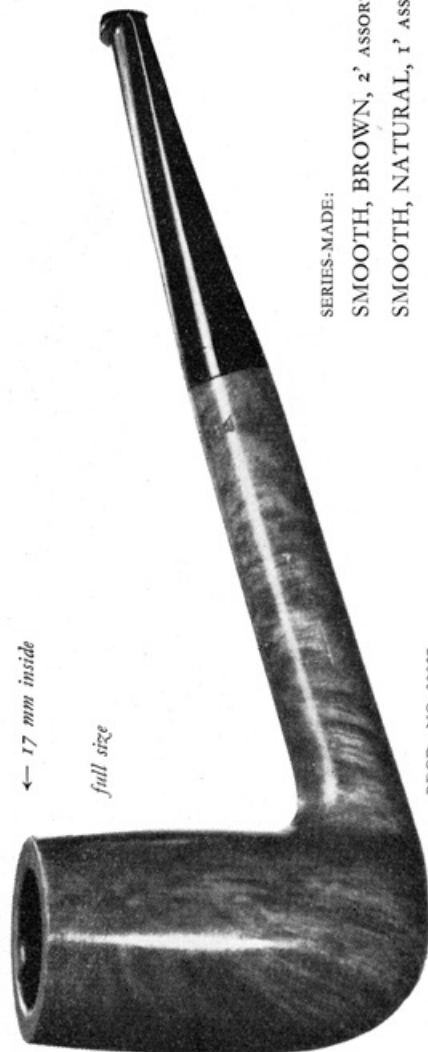

We will gladly repair your pipe(s)! Then it will be necessary to us to receive the pipe bowl and if possibly the mouthpiece too if you do want the same size and type. Mail the repairs to us by ordinary post as registered (first class) sample. Air mail is very expensive and you must remember we have to add the handling charge the invoice.

OTHER DANISH PIPES

From the pipemanufactories: Stanwell, Kriswill, Brakner and so on we do carry in our shop too. Therefore you are welcome to order these too. If possible give us the number of shape you do want.

(See our unusual terms on the last page)

THE HIGHEST FASHION

for enjoyment of tobacco—and the most healthy too—is pipe-smoking!

The DAN CHIMNEY pipe affords the same pleasure as the Habanna-cigar to a cigar-smoker.

The even burning of the tobacco takes place in the same way. The boring of the pipe-bowl is only 14 mm, and the bowl is *vertical* during smoking—as of all other

NOW YOU WILL FIND ON PAGES 43 TO 52 THE WORLDS FINEST HANDSHAPED PIPES

Photographs and silhouettes are in actual size, but each 100 per cent hand-shaped pipe will, of course, display individual deviation.

This fact characterizes quality and style, since it shows how in each block of briar the structure of the wood has been utilized to provide the highest possible beauty as well as maximal strength.

Again just the variation inherent in the material will generally allow for minor personal wishes as to shape and make, should none of the many models shown suit you completely - most often without extra charge.

What will influence the price of the perfect pipe are:

1 THE STRUCTURE. Well defined and symmetric lines of fibre .

CLASSIFIED IN CHARACTER OF THE GRAIN	FULL STRAIGHT	outmost seldom	1/2
	STRAIGHT-GRAINED	very seldom	1/2
	BIRDS EYE, horizontal grain	very seldom	1/2
	BIRDS EYE, cross grain	seldom	2/3
	BIRDS NEST, horizontal grain	seldom	3
	BIRDS NEST, cross grain	seldom	4
	CROSS AND FLAME GRAIN	often	12
MIXED GRAINED	90% of all briar-root	25	

2 ROOT QUALITY. Tightness, hardness. 50.-

3 SIZE. Prices will increase progressively with block size. Large size is often necessary to obtain structural excellence in spite of small shape.

4 FAULTLESSNESS. Only second quality pipes will not be faultless. Faults are small short-comings as to structural beauty or superficial scars, which will be filled only if pronounced.

5 SHAPE. Complicated form with special demands to composition.

6 FINISH. Prolonged and repeated surface treatment by hand.

7 COLOUR. The most expensive examples are the fair and two-coloured ones, the latter being the result of a highly specialized surface treatment created to emphasize the structural nuances of the wood.

EXTRA SELECTED pipes will satisfy all the demands laid down. However, sometimes the unique may occur, and then the price may rise to twice or three times the minimum quotations.

FIRST QUALITY pipes with smooth scarless surface are also made from the very best blocks and appear with an excellent finish.

SECOND QUALITY pipes are still technically perfect, but will be sold at much lowered prices because of structural short-comings, model deviations induced by small block size, scars (which may be filled), less individual finish, and somewhat dark colour.

All pipes are marked with 1, 2, or 3 asterisks (*) indicating the smoking toughness, and please state if you usually puff vigorously.

MAY WE PRESENT THE WONDERFUL DAN PIPE CABINET

THIS IS THE FRONT OF THE
CABINET WITH THE MARVELLOUS INLAID
OF BEAUTIFUL FANCY WOODS

See it opened on next page

Here you see it opened! The exquisite...

DAN PIPE-CABINET

is for the connoisseur, who loves his pipes and wants to protect them – and who likes to show his friends his collection. If you are pipe-minded you will know that your wife will appreciate that pipe-cabinet! Your pipes may often have irritated your wife when they had to be dusted, and maybe your wife has been afraid of removing them, even to touch them!

The cabinet can be hung on the wall. The size is 70 x 50 x 19½ cm and about 40 pipes of all kinds can be placed in it.

It contains a spacious drawer for your tobacco, pipecleaners, scrapers and other pipeutensiles.

The *inlaid* on the door is a wonderful work of art that will give real pleasure every time your eyes behold it. The price is in Oak from Kr. 350.– to 375 and in Teak 365 to 395 Kr. Can be mailed all over the world.

Mailed to U.S.A. the price is \$60.– included all handling charges. Delivered in special fibre box.

RARITY

TWIN DAN PIPES

HANDSHAPED OUT OF THE VERY SAME BLOCK
OF 250 YEARS OLD CORSICAN BRIAR-ROOT
(BOTH PERFECT STRAIGHT-GRAINED)

*this is the briar-block
where the two pipes were cutted from.
Such TWIN SETS is only to be found at
museums and private large collections.*

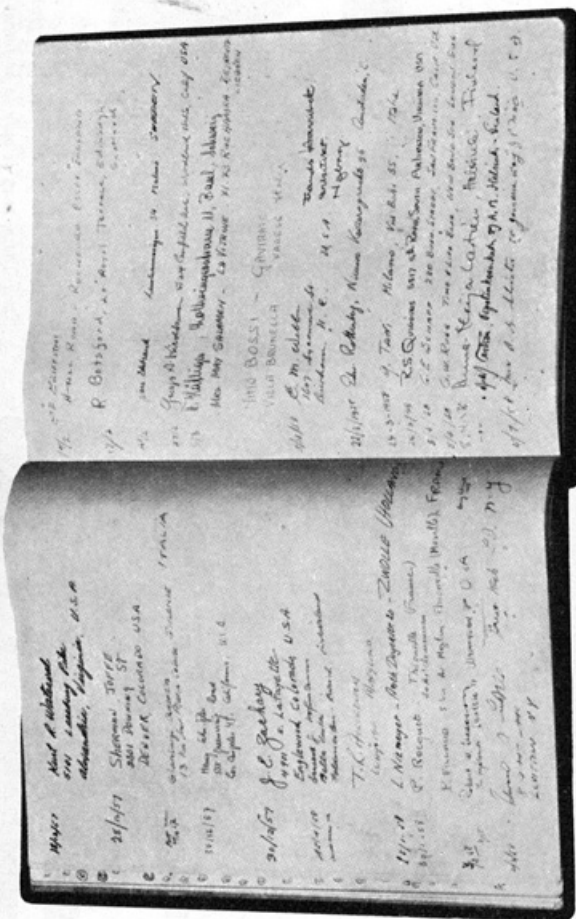

PIPE-HINTS

1. Buying a new pipe be sure that the boring of stem or shank canal is centred at the very bottom of the bowl. Observe that the bite of the mouth-piece is as thin as possible.
2. Don't moisten a new pipe before use. Don't use glycerin, spirit or other liquids.
3. A new pipe has to be filled up with tobacco from bottom to the very top. The heat should be evenly distributed over the whole bowl. Avoid partial filling as it produces overheating in the center.
4. In a properly-packed pipe, the tobacco is never too tight, but slightly loose. The tighter you pack your tobacco, the warmer your pipe will be, and of course your tongue.
5. The carbon crust should not be allowed to accumulate. A layer of $\frac{1}{2}$ to 1 mm. is recommended. A thicker layer implies a risk for overheating and cracking the bowl.
6. Always use the scraper that corresponds to the internal form of your pipe bowl. Don't use a knife blade or other sharp instrument.
7. Never leave 'metal-systems' inside the stem. After each smoking use a simple pipe-cleaner and leave the cleaner in the pipe to absorb the moisture.
8. Avoid refilling a hot pipe. Rotate your pipes. IF THE BOWL BECOMES TOO HOT TO HANDLE, ALLOW THE PIPE TO REST AND COOL, SINCE THE HIGH TEMPERATURE MAY INVOLVE DESTRUCTION OF THE WOOD!
9. When your pipe is hot, never remove the mouth-piece: since tenon or push is expanded - due to the heating of the material - the shank can split.
10. Above all - the fire in your pipe will go out coming to the last third of the bowl. Do not scrape this rest of tobacco away, but take away the ash and tamp the tobacco a little hardly down and fire again.

Every Pipe you smoke has to be smoked down to the very bottom. This is...

The Main Thing of Pipe-Smoking

MAIL ORDER INFORMATION TO U.S.A.

Duty free import to U.S.A.

Every U.S.A. citizen travelling abroad for at least 12 days is entitled to import, exempt from duty, goods to the value of

500 dollars

No matter whether to articles are brought back in the luggage or are sent later.

Orders arriving from U.S.A.

If you wish to order one pipe or several sent to your state in U.S.A. it can be sent free of duty to you.

Then fill out an order-sheet and mail it to us.

We always mail in a registered, first class letter, and to avoid the duty, we mark the letter:

"Free gift under value 10\$"

But it is only allowed to mail one letter a week to each person, therefore if many pipes there may be advantage in mailing to two or three names and addresses.

When you then have received the goods in perfect condition and have examined them, you can pay us in your personal cheque, or money order.

DO NOT PAY US BEFOREHAND!

We trust you - and you will find you can trust us. Therefore - we do not wish the payment beforehand.

Where the prices are noted from - to kroner . . . please note how much you do wish to spend, up to kr. . . , or not over kr. . .
